Shining Brightly In Times of Uncertainty

CNMC Goldmine Holdings Limited, established in 2006 and headquartered in Singapore, commenced operations in 2007 and became the first gold miner listed on the SGX Catalist board in 2011. The company focuses on gold production, exploration, mining, and processing, with additional interests in silver, lead and zinc. Its flagship project, the Sokor Gold Field in Kelantan, Malaysia, covers 10 km² and contains JORC-compliant resources of 918,000 ounces of gold.

1H24 revenue was up 13.1% yoy to \$29.7m, driven by increased gold production and favorable gold prices. The Group's flagship Sokor mine in Malaysia's Kelantan state saw a 27.2% rise in gold output to 9,357 ounces, with an average selling price of US\$2,266 per ounce—the highest in the Group's history. Despite increased output, the all-in cost per ounce of gold decreased to US\$1,325 from US\$1,415 in 1H2023, reflecting improved operational efficiencies. Net profit after tax surged by 159.2% yoy to US\$5.5m, with net profit attributable to owners increasing by 160.4% to US\$4.4m. The Group's profitability was significantly bolstered by higher gold prices and enhanced production levels, leading to the highest 1H profit in eight years.

The Group has announced the expansion of the carbon-in-leach (CIL) plant at its Sokor Gold Project, which is expected to increase the Group's gold processing capacity by 60%, from the existing 500 tonnes per day to 800 tonnes per day. The estimated cost of this expansion is up to RM9.0 million, to be funded through the Company's internal resources, and it is expected to be completed by the first half of next year, barring any unforeseen circumstances.

Several factors could influence gold prices in the coming months. The Federal Reserve is anticipated to start reducing US interest rates soon, while central banks globally are showing strong interest in gold. The approach of the US presidential election in November 2024 is also likely to impact gold prices, potentially benefiting CNMC's financial performance in the latter half of the year. Additionally, ongoing geopolitical tensions—including conflicts in Europe and the Middle East, disruptions in supply chains following rebel attacks on commercial vessels in the Red Sea last year, and more than 60 elections occurring globally in 2024—could further enhance gold's appeal as a safe-haven asset.

BUY; Amid the uncertain backdrop, we anticipate elevated gold prices to persist, coupled with the planned capacity expansion we project revenue growth of 17% and 18% for FY24 and FY25, respectively, which in turn is expected to enhance net profit by 16% and 15%. By applying a 40% discount to the valuation of larger global peers, we arrive at a price target of S\$0.33, representing a 39% upside from current levels. We initiate coverage with a buy recommendation.

Potential risks include (i) volatility in gold prices, which could significantly impact revenue and profitability if prices decline due to global economic shifts or reduced investor demand, (ii) operational risks related to mining activities, such as equipment failures or delays in the expansion of the Sokor mine and carbon-inleach (CIL) plant, which could disrupt production and increase costs, and (iii) regulatory and environmental risks, particularly changes in mining regulations or environmental standards in Malaysia, which could lead to increased compliance costs, fines, or operational shutdowns.

Company Overview

The Group is primarily involved in the exploration, mining, and processing of gold ore into gold dore bars. The Group's main focus is the development of its flagship Sokor Gold Field Project, located in the state of Kelantan, Malaysia. The Group poured its first gold on July 21, 2010, and has seen a steady increase in production. By December 2017, gold production had surpassed three metric tonnes of gold bullion.

The Sokor Gold Field Project spans an area of 10 square kilometers and includes five identified gold deposits: Manson's Lode, New Discovery, New Found, Sg. Ketubong, and Rixen. As of 31 December 2023, the total Measured, Indicated and Inferred gold Mineral Resources for the Group's flagship Sokor project (cut-off grade is 0.5 g/t gold for the transitional and fresh rock at New Discovery and New Found, 1.0g/t gold within the vicinity of the planned underground workings at Ketubong and Rixen, 0.17g/t gold for the oxide material at New Discovery and New Found, and 0.17 g/t gold for material at Rixen planned to be extracted using open pit mining) amounted to 16,240 kt at 1.7 g/t gold for 880,000 ounces of contained gold (inclusive of material used to define Ore Reserves) for CIL processing and 2,470 kt at 0.5 g/t gold for 38,000 ounces of contained gold (inclusive of material used to define Ore Reserves) for flotation processing.

The total Mineral Resource for the silver, lead and zinc mineralisation, as of 31 December 2023, is 2,720 kt with an average grade of 78 g/t silver, 2.8% lead and 3.5% zinc. This represents contained silver of 6,890,000 ounce, contained lead of 76,850 tonnes, and contained zinc of 96,270 tonnes. Ongoing exploration at the Sokor Gold Field Project aims to extend the mine's life and identify new production targets.

With its extensive experience in the Malaysian mining sector and a focus on long-term growth, the Group actively seeks strategic opportunities for collaboration with potential partners or the acquisition of new exploration and mining licenses within the ASEAN region and Australasia.

Sokor Gold Field Project

Geographical Location

The Sokor Gold Field is the company's primary project. It spans 2,370 acres and is located in the Tanah Merah District, Kelantan, Malaysia. The site can be accessed by traveling southwest from the town of Tanah Merah. Geologically, the area consists of mildly metamorphosed volcanic formations dating back to the Permian and Triassic periods. The Permian rocks, situated in the eastern section, are primarily composed of phyllite with interbedded limestone, slate, metasandstone, and schist. These layers are overlain by a Triassic sequence, mostly intermediate tuffs and flows, which are most prominent in the western part of the field. Open-pit mining at the site is carried out using a combination of haul trucks and excavators.

Recent Developments

Expansion of Gold Processing Capacity at Sokor Gold Project

The Group is expanding the carbon-in-leach ("CIL") plant at its Sokor Gold Project, increasing processing capacity by 60% from 500 to 800 tonnes per day. The RM9.0 million expansion, funded internally, is set for completion by the first half of next year, subject to any unforeseen delays. This initiative aims to enhance efficiency, boost output, and improve profitability.

10-year sales agreement with Yuchen Resources

CNMC has initiated a growth strategy to ramp up base metal production through a 10-year sales agreement with Yuchen Resources, providing long-term income stability. This agreement, effective from January 1, 2024, to December 31, 2033, is expected to offer greater financial visibility and contribute to the company's sustained growth.

Reduce Costs

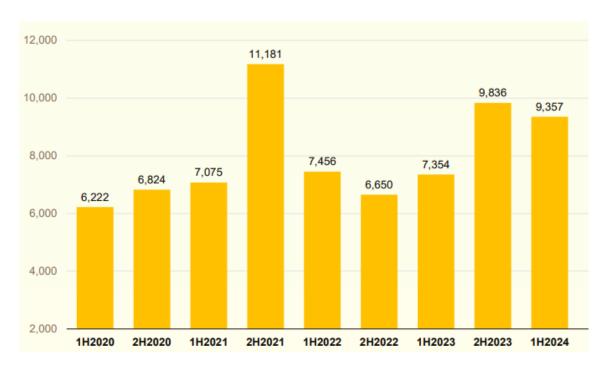

CNMC is focusing on tightening cost controls by implementing energy-efficient power generators to reduce fuel consumption and carbon emissions. Optimizing fuel usage is expected to lower operational expenses at the site and factory, as fuel is one of the Group's largest cost components.

Fine Gold Produced (ounces)

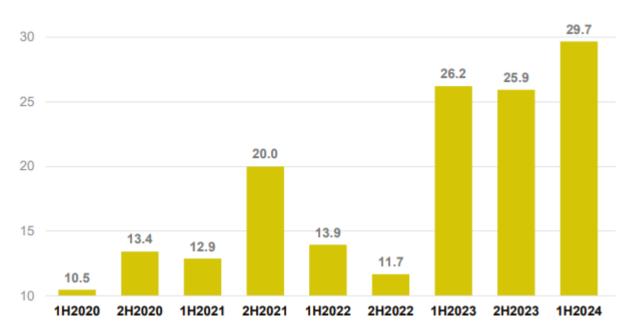

There was a significant peak in fine gold production at 11,181 ounces in 2H21, followed by a recovery to 9,357 ounces in 1H24, reflecting a 16.3% decline from the peak but a 40.7% increase from the low of 6,650 ounces in 2H 2022.

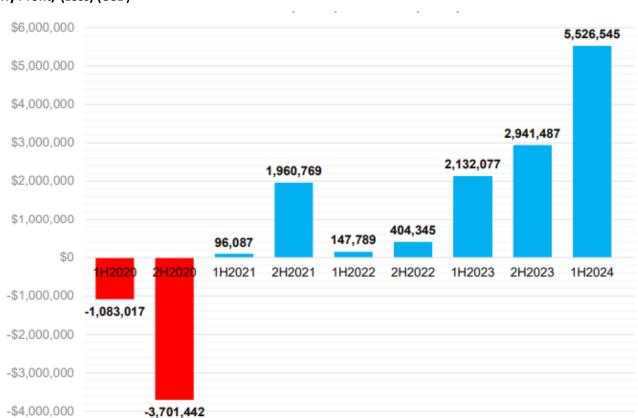

Half-yearly Revenue (USD m)

Revenue steadily increased from \$10.5 million in 1H20 to \$29.7 million in 1H24. Net profit also recovered from a significant loss of \$3.7 million in 2H20 to a profit of \$5.5 million in 1H24, showcasing a marked turnaround in financial performance.

Half-yearly Profit/(Loss)(USD)

Dividend Payout Ratio

The Group has a fixed dividend policy, aiming to distribute up to 30% of our net profit to shareholders as dividends whenever possible. For 1H2024, the company has declared an interim dividend of 0.400 SG cents, reflecting continued commitment to shareholder returns.

Valuation

Applying a 40% discount to the valuation of larger global peers, we set a price target of S\$0.33, offering a 39% upside, and initiate coverage with a buy recommendation.

Key Factors Shaping Gold Prices

Fed Lowering Interest Rates

The Federal Reserve's decision to lower interest rates plays a crucial role in shaping gold prices. When interest rates decrease, the opportunity cost of holding non-yielding assets like gold diminishes, making gold a more attractive investment option. Lower interest rates typically weaken the U.S. dollar, further supporting gold prices by making it more affordable for foreign investors. Additionally, the prospect of rate cuts can signal economic uncertainty or efforts to stimulate growth, both of which tend to drive demand for safe-haven assets such as gold. In 2024, the Fed's anticipated rate cuts are expected to be a key factor influencing the continued upward momentum in gold prices.

Increased Gold Demand from Central Banks Worldwide

Central banks worldwide have significantly increased their demand for gold, contributing to a notable rise in global gold purchases. This surge, particularly from emerging markets, has been driven by various economic and geopolitical factors. Central banks view gold as a strategic asset that provides financial stability and a hedge against currency fluctuations, inflation, and global uncertainties. In 2022 and 2023, central banks exceeded 1,000 tonnes of gold purchases annually, accounting for nearly a quarter of global gold demand. This strong appetite is expected to continue in 2024, with central banks playing a critical role in sustaining high levels of gold buying, especially in the face of volatile financial markets and economic challenges.

Global Elections

The year 2024 is expected to be the busiest election year ever, with nearly half of the world's population heading to the polls.

Supply chain Disruptions

The Red Sea Crisis in 2024 has caused significant disruptions to global supply chains, forcing ships to avoid the Suez Canal and take longer routes around Africa. Iran-backed Houthi rebels have been attacking ships in the Red Sea since October 2023, demanding an end to the invasion of the Gaza Strip. As a result, shipping costs have risen, and trade routes have been altered, impacting international economies and leading to higher freight prices.

The cost of shipping has surged due to this crisis. Some trade routes have become longer and nearly five times more expensive, heavily affecting the trade path from Asia to Europe. These higher transportation costs are passed on to consumers, contributing to accelerated inflation. The crisis has also necessitated the redirection of over \$80 billion worth of cargo through alternative trade routes.

DISCLAIMERS AND DISCLOSURES

This report has been prepared and distributed by SAC Capital Private Limited ("SAC Capital") which is a holder of a capital markets services licence and an exempt financial adviser in Singapore.

This report has been prepared for the purpose of general circulation, we have not had regard to the specific investment objectives, financial situation, tax position or unique needs and constraints of any individual person or any specific group of persons and does not purport to be comprehensive or contain all necessary information which a prospective investor may require in arriving at an investment decision. Any prospective purchaser should make his own investigation of the securities and all information provided. Advice should be sought from a financial adviser regarding suitability, taking into account the specific investment objectives, financial situation or particular needs of the person in receipt of the recommendation, before a commitment to purchase is entered into.

This report does not constitute or form part of any offer or solicitation of any offer to buy or sell any securities. This report is confidential and the information in this report shall not be copied or reproduced in part or in whole, and save for the recipient of this report, shall not be disclosed to any other person without the prior written consent of SAC Capital. The distribution of this report outside the jurisdiction of Singapore is also strictly prohibited.

Whereas SAC Capital has not independently verified all the information set out in this report, all reasonable care and effort has been taken to ensure that the facts stated herein are accurate, this report might contain certain forward looking statements and forward looking financial information which are based on certain assumptions and involve known and unknown risks, uncertainties and other factors which may cause the actual results or performance of the subject company to be materially different from those expressed herein. Predictions, projections or forecasts of the economy or market trends are not indicative of the future performance of the subject company. The inclusion of such statements and information should not be regarded as a representation, warranty or prediction with respect to the accuracy of the underlying assumptions of the subject company or that the forecast results will or are likely to be achieved.

Our opinion and facts set out in this report are based on the market, economic, industry and other applicable conditions prevailing as at the date of the preparation of this report. Such conditions may change significantly over a relatively short period of time and we assume no responsibility to update, revise or reaffirm our opinion in light of any development subsequent to the publication of this report, that may or may not have affected our opinion contained herein.

This report contains forward-looking statement which are based on assumptions or forecasts and are subject to uncertainties which may result in the actual result or performance to be materially different from the opinion or facts set out herein. Caution should be exercised in placing undue reliance on such statements, such assumptions or forecasts may change over a relatively short period of time and we assume no responsibility to update, revise or reaffirm our opinion in light of any development subsequent to the publication of this report.

No representation or warranty, expressed or implied, is made and no responsibility is accepted by the company, SAC Capital, or any of their affiliates, advisers or representatives as to the fairness, accuracy, completeness or adequacy of such information or facts, in this report or any other written or oral information made available to any interested party or its advisers and any liability therefore is hereby expressly disclaimed.

SAC Capital and its associates, directors, and/or employees may have positions in the securities covered in the report and may also perform or seek to perform other corporate finance and/or capital markets related services for the company whose securities are covered in the report. SAC Capital and its related companies may from time to time perform advisory services or solicit such advisory services from the entity mentioned in this report ("Other Services"). This report is therefore classified as a non-independent report. However, the research professionals involved in the preparation of this report are independent of those possible or actual business relationships as they have not and will not participate in the solicitation or provision of such business.

As at the date of this report, SAC Capital does not have proprietary positions or interests in the subject company, except for:

Party	Quantum of position
Nil	Nil

As at the date of this report, none of the analysts who covered the securities in this report have any proprietary position or material interest in the subject companies covered here in, except for:

Analyst name	Quantum of position
Nil	Nil

ANALYST CERTIFICATION/REGULATION AC

As noted above, research analyst(s) of SAC Capital who produced this report hereby certify that

- (i) The views expressed in this report accurately reflect his/her personal views about the subject corporation(s);
- (ii) The report was produced independently by him/her;
- (iii) He/she does not on behalf of SAC Capital or any other person carry out Other Services involving any of the subject corporation(s) or securities referred to in this report; and
- (iv) He/she has not received and will not receive any compensation directly or indirectly related to the recommendations or views expressed in this report or to any sales, trading, dealing or corporate finance advisory services or transaction in respect of the securities in this report. He/she has not and will not receive any compensation directly or indirectly linked to the performance of the securities of the subject corporation(s) from the time of the publication of this report either.
